Semester Grade Point Average (SGPA):

The Semester Grade Point Average (SGPA) is calculated by multiplying the grade points earned in each course by the respective credit hours of that course

$$SGPA (Si) = \sum (Ci * Gi) / \sum Ci$$

Where Ci the number of credits of the i^{th} course and Gi is the grade point scored by the student in the i^{th} course.

Cumulative Grade Point Average (CGPA):

The Cumulative Grade Point Average (CGPA) is the average of the SGPA obtained in each semester taking into account the credit hours of each semester.

$$CGPA = \sum (Ci * Si) / \sum Ci$$

Where Si is the SGPA of the i^{th} semester and Ci is the total number of credits in that semester.

Conversion of CGPA into percentage of Marks:

Percentage of marks can be computed by multiplying CGPA by 10.
